PART 3 · USING YOUR FORECAST

How to Use This Forecast

- **Ratings** (1 to 5) compare months with each other for you. A 2 is not bad luck; it means go slower and prepare.
- **Why** lines name the planets behind each rating, so you can see the reasoning.
- **Good days** are best for starting important things: interviews, purchases, travel, proposals, signing.
- **Dasha periods** set the long-term theme; transits (the planets' movement) set the monthly weather.
- Read the month ahead at the start of each month, and plan around its good days.

PART 3 · USING YOUR FORECAST

Frequently Asked Questions

Is a low month dangerous? No. It is a time for patience, preparation and care. Many people do their best long-term work in quiet months.

Why does my forecast differ from my friend's with the same sign? Because it is calculated from your own Moon, ascendant and dasha periods, not just your Sun sign.

My birth time is not known. Is the forecast still useful? Yes. Monthly ratings use transits from your Moon sign, which do not need the birth time. Only the dasha sections need an exact time.
